ABOUT US

UniTalk® is a unique 'Communications Technology and Software' Company that opens and enhances global communication across a diverse range of complex scenarios. UniTalk's patented TouchPhrase Technology communication platform is aimed directly at evolving current markets for businesses and the public sector including creating safe and easily accessible communication platforms for people of all ages and abilities. It is award winning, attracting national media coverage.

UniTalk's bespoke, custom made translator opens a world of communication for children, schools, businesses, corporations, community organisations, public services and other groups all over the world. Custom built to include programmed pre-written sentences with the client's choice of translations, allows for cross-language, real-time communication. It's a fantastic method to helping solve the first initial hurdle of the global problem of language barriers. It's ideal for any industry and can be used for feedback forms, B2B and B2C communication in real-time that is quick, fast and easy to use; it's 100% accurate and 100% safe.

Multi-award winning www.smilentalk.com utilises the first model for children under 13 who are too young to use FaceBook, it is fun, safe and easy to use. It encourages individuals to share their language and world with others, breaking down language and cultural barriers. It is the safest social network for kids on the internet and a great gateway to e-learning and global cohesion.

The translator as a product to date has been put through rigorous testing, trialling and piloting with a cross section of potential client groups over a 2-year period. 60 schools joined the Smile'n'Talk site and over 3000 children worldwide. A mini-documentary of the pilot from the Hollies school, Wales, showcases the positive responses and effects it has from children, teachers, a local councillor and an online safety expert from EyePAT Ltd.
